Q-1 Code:

```python
numlist = [8,7,7,2,9,1,8,2,9]

counter = 0
n = len(numlist)

for x in numlist:
    i = 0
    while i < n:
        if x == numlist[i]:
            counter += 1
            i += 1
        else:
            i+=1
    if counter == 1:
        print "Odd number = ", x
        break
    else:
        counter = 0
```
